

BARASAT GOVT COLLEGE
POST GRADUATE DEPARTMENT OF ZOOLOGY
B.Sc. Zoology (Hons) CBCS Syllabus
With effect from 2018-19

Programme Specific Outcomes

- Students gain knowledge and skill in the fundamentals of animal sciences, recognizes the complex interactions among various living organisms
- Apply the knowledge of internal structure of cell, its functions in control of various metabolic functions of organisms.
- Analyse complex interactions among the various animals of different phyla, their distribution and their relationship with the environment
- Understands the physiological processes of animals and relationship of organ systems
- Gain knowledge of Agro based Small-Scale industries like sericulture, fish farming, etc.
- Understands about various concepts of genetics, molecular biology and its importance in human health; and the physiological aspects of human and other vertebrates
- Skill Enhancement Courses develop employable skills in aquarium fish keeping and vermicomposting.
- This program covers theoretical studies and practical proficiency training which may help in their placement at several pharmaceutical/ biotechnology/ microbiology/ based laboratory and/ or preparation of M.Sc. entrance examination for universities & institutes.
- The students will get a flavour of research besides improving their writing skills and making them well versed with the current trends, and enable the students to think and interpret individually due to different aspects chosen, after successful completion of this course.

BARASAT GOVERNMENT COLLEGE
Course Outcome or Learning Outcome
Three year B.A. /B.Sc. degree course
Under CBCS semester system
HONOURS COURSE IN ZOOLOGY
With effect from the session: 2018 – 2019

Course Name: Core Course-1
Course Code: ZOOACOR01T & ZOOACOR01P
Topic Name: Animal Diversity- Non-Chordates I

Course Outcome: Non-Chordate: Protozoa to Nemathelminths
Both theory and practical paper based on systematic animal diversity and evolution
Courses outcome:
1. Different groups of invertebrate animals are studied in this course including Protozoa, Porifera, coelenterate, Platyhelminthes, and Aschelminthes, General characters and classification upto classes are studied. Some special features, organs, pathogenecity, life history and significance are studied here.
II. It will help the students to aware of basic taxonomy of non-chordate.
III. Student will learn to identify non-chordates from their special features.
IV. Understanding the mode of infection of parasites, their evolution and adaptation.

Course Name: Core Course-2
Course Code: ZOOACOR02T & ZOOACOR02P
Topic Name: Ecology

Course Outcome: Ecology:
Both theory and practical paper cover basic ecology such as study of physical factor and its interaction with the environment, population, community etc and its application such as conservation of wild life and natural recourses.
Course outcome:
I. Understand the basic concepts of ecology, biogeochemical cycles & Population Ecology.
II. Understand the study of life history pattern, fertility rate and age structure.
III. Understand the types and function of ecosystem, Characteristics of Community; Ecological Succession and Major Biomes of the world.
IV. Students will involve in the protection and conservation of nature and natural resources

Course Name: Core Course-3
Course Code: ZOOACOR03T & ZOOACOR03P
Topic Name: Non-Chordate II

Course Outcome: Non-chordates are animals without a notochord – the rod-like elastic structure that supports the body. This phylum consists of a small group of worm-like, marine species with an organ-system level of organization.
The course makes a detailed comparison of the anatomy of the different taxa of non- chordates. The course thus gives an overview of the intricate life processes and adaptive radiations in non -chordates.
After successfully completing this course, the students will be able to
1. Develop an understanding of the characters used to classify besides being able to differentiate the organisms belonging to different taxa.
2. Have hands on experience of materials demonstrating the diversity of protists and non-chordates.
3. Understand the relative position of individual organs and associated structures through dissection of the invertebrate representatives.
4. Understand some special features like torsion of molluscs, water vascular system of Echinodermata, filter feeding of lower chordates, metamorphosis of insects and its hormonal control.
5. Get a flavor of research by working on project besides improving their writing skills. It will further enable the students to think and interpret individually.

Course Name: Core Course-4
Course Code: ZOOACOR04T & ZOOACOR04P
Topic Name: Cell Biology

Course Outcome: The course provides a detailed insight into basic concepts of cellular structure and function. It also gives an account of the complex regulatory mechanisms that control cell function, cancer, tumor. After successfully completing this course, the students will be able to

1. Understand the functioning of nucleus and extra nuclear organelles like mitochondria, RER, Golgi bodies, cytoskeleton and understand the intricate cellular mechanisms involved.
2. Acquire the detailed knowledge of different pathways related to cell signaling and apoptosis, PCD, Necrosis, thus enabling them to understand the anomalies in cancer.
3. Understand clinical aspects, including epidemiology, tumor cell metabolism, cancer stem cells, DNA viruses, metastasis and therapeutic strategies.
4. Get new avenues of joining research in areas such as cancer research, researches related to signal transduction pathways, cell viability assays, diabetes research etc.
5. Understand how tissues are produced from cells in a normal course and about any malfunctioning which may lead to benign or malignant tumor.
6. It will help students in competitive exam like NET, SET, GATE

Course Name: Core Course-5
Course Code: ZOOACOR05T & ZOOACOR05P
Topic Name: Chordates

Course Outcome: The course is a walk for the Bachelor's entrant through the amazing diversity of living forms from simple to complex one. It also deals with the differences and similarities between organisms on the basis of their morphology and anatomy which led to their grouping into taxa and clades.

After successfully completing this course, the students will be able to:

1. Develop understanding on the diversity of life with regard to chordates.
2. Group animals on the basis of their morphological characteristics/ structures mainly Fishes, Amphibia, Reptilia, Birds and Mammals
3. Understand how morphological change due to change in environment helps drive evolution over a long period of time.
4. The practical lab works will also give them a flavor of research to find the process involved in studying biodiversity and taxonomy besides improving their writing skills. It will further enable the students to think and interpret individually due to different animal species chosen.
5. It will help students in competitive exam like NET, SET, GATE

Course Name: Core Course-6
Course Code: ZOOACOR06T & ZOOACOR06P
Topic Name: Physiology: Controlling and Coordinating System

Course Outcome: The course offers insight into the physiology of chordates, mammals while giving an account of their anatomy. The course deals with various physiological functions in mammals. It also gives an account of the metabolic/ biochemical pathways and the probable impact of environment on them. The major objective of this course is to provide students with a sound coverage of human reproductive biology within the framework of Human Biology. It also envisages the detailed structure and function of the male and female reproductive tracts, gametogenesis, fertilization, early embryogenesis, fetal development and preparation for birth, and maternal adaptations to pregnancy. The students will also be taught about the types of synapse, neurotransmitters and their receptors besides other related aspects. The course envisages information on endocrine system with emphasis on the structure of hypothalamus and anterior pituitary. The associated hormones and the related disorders will be explained.

After successfully completing this course, the students will be able to:

1. Understand how cells, tissues, and organisms function at different levels.
2. Understand the physiology at cellular and system levels.
3. Understand the organization of nervous system and process of nerve conduction.
4. Understand the process of muscle contraction.
5. Explain and contrast the processes of spermatogenesis, oogenesis.
6. Demonstrate an understanding of the hormonal control of reproduction in males and how this is regulated;
7. Distinguish between the main stages of embryonic, foetal and neonatal development and causes of foetal disorders.
8. Understand the structure of brain and improved methods to study it.
9. Develop treatments for neurodegenerative diseases (such as Alzheimer's and Parkinson's diseases) and mental illnesses.
10. Understand the structure of different lobes of the brain and their corresponding functions.
11. Understand intricacies of nerve impulse conduction.
12. Understand neurohormones and neurosecretions.
13. Learn about hypothalamo - hypophysial axis.
14. Understand about different endocrine glands and their disorders.
15. Understand the mechanism of hormone action.
16. In-depth theoretical knowledge and practical experience in the field are the foremost factors to work successfully as an Endocrinologist or Diabetologist. The job of a Diabetologist demands responsibility, sincerity, self-confidence and distinct skills and only by perfecting and honing those skills in everyday work, one can establish oneself as a successful Diabetologist.
17. Develop an understanding of the related disciplines, such as cell biology, neurophysiology, pharmacology, biochemistry, endocrinology etc.
18. Get a flavor of research besides improving their writing skills and making them well versed with the current trends. It will further enable the students to think and interpret individually due to different aspects chosen.
19. Undertake research in any aspect of animal physiology like cancer biology, endocrinology, neurobiology in future. It will help students in competitive exam like NET, SET, GATE

Course Name: Core Course-7
Course Code: ZOOACOR07T & ZOOACOR07P
Topic Name: Biochemistry

Course Outcome: The course provides an introduction to the structure of biomolecules with emphasis on the techniques used for structure determination and analysis. The course covers basic aspects of sample preparation for analysis and aims to enlighten the students how structural information can be utilized for better understanding of biological processes.

The course aims to provide an advanced understanding of the core principles and topics of Biochemistry and their experimental basis, and to enable students to acquire a specialized knowledge and understanding of selected aspects by means of a stem/branch lecture series and a research project.

After successfully completing this course, the students will be able to:

1. Understand about the importance and scope of biochemistry.
2. Understand the structure and biological significance of carbohydrates, amino acids, proteins, lipids and nucleic acids.
3. Understand the structure and function of immunoglobulins.
4. Understand the concept of enzyme, its mechanism of action and regulation.
5. Understand the process of DNA replication, transcription and translation.
6. Learn the preparation of models of peptides and nucleotides.
7. Learn biochemical tests for amino acids, carbohydrates, proteins and nucleic acids.
8. Learn measurement of enzyme activity and its kinetics.
9. Develop an understanding of the related disciplines, such as cell biology, neurophysiology, pharmacology, biochemistry, endocrinology, recombinant DNA technology, genetic engineering, cloning vector biology, cell culture etc.
10. The practical and technical skills through laboratory-based work will prepare a student well for a research or technical position.

Obtaining some work experience, for example a summer internship in a research laboratory or company, will help the students to boost chances of finding a job. It will help students in competitive exam like NET, SET, GATE

Course Name: Core Course-8
Course Code: ZOOACOR08T & ZOOACOR08P
Topic Name: Comparative Anatomy

Course Outcome: In this paper the students will study the comparative anatomy of different organ of the vertebrate that will give them an idea of structure of the organs, their structural development and how they become modified according to their mode of their life (Adaptation).

Course Name: Core Course-9
Course Code: ZOOACOR09T & ZOOACOR09P
Topic Name: Physiology- Life Sustaining System

Course Outcome: Course outcome:
After successfully completing this course: Student will able to

- I. Students gain fundamental knowledge of animal physiology
- II. Know the physiological mechanism the work to keep the animal body alive and functioning.
- III. Interaction and interdependence of physiological and biochemical process.
- IV. Any abnormalities or disease caused by metabolic error.
- V. Students will gain skill to execute the roles of a biology teacher or medical lab technicians with training as they have basic fundamentals

Course Name: Core Course-10
Course Code: ZOOACOR10T & ZOOACOR10P
Topic Name: Immunology

Course Outcome: Course outcome:

- I. Provides basics knowledge about immune system (Molecules, cells and tissue involved in host defence mechanism) and allows the student to create awareness as how to boost their immune system for good health.
- II. Understand the Basic structure, classes and function of Antibodies, Types of immunity (Innate and Adaptive, Humoral and Cellular), Antigen-Antibody interaction, Complements and MHC.
- III. Understand the types of hypersensitivity reactions and auto immune diseases.
- IV. Understand the immune mechanisms in disease control.
- V. They will know the immune diffusion technique, ELISA , RIA , Hybridoma technology and monoclonal antibody production.
- VI. They will know the manipulation of immune responses for the benefit of mankind, vaccines.

Course Name: Core Course-11
Course Code: ZOOACOR11T & ZOOACOR11P
Topic Name: Molecular Biology

Course Outcome:

1. Develop an understanding of concepts, mechanisms and evolutionary significance and relevance of molecular biology in the current scenario.
2. Understanding recombinant DNA technology which holds application in biomedical & genomic science, agriculture, environment management, etc. Knowledge of Molecular Biology will help in career building in all these fields.
3. Apply their knowledge in problem solving and future course of their career development in higher education and research.
4. Provide new avenues of joining research in related areas such as therapeutic strategies or related opportunities in industry

Course Name: Core Course-12
Course Code: ZOOACOR12T & ZOOACOR12P
Topic Name: Genetics

Course Outcome:

1. Understand the mechanism how DNA encodes genetic information and the function of mRNA and tRNA
2. Apply the principles of Mendelian inheritance.
3. Understand the cause and effect of alterations in chromosome number and structure.
4. Relate the conventional and molecular methods for gene manipulation in other biological systems.
5. Discuss and analyse the epigenetic modifications and imprinting and its role in diseases.
6. Provide new avenues of joining research in related areas such as genetic engineering of cells, cloning, genetic disorders, human fertility programme, genotoxicity.

Course Name: Core Course-13
Course Code: ZOOACOR13T & ZOOACOR13P
Topic Name: Developmental Biology

Course Outcome: After successful completion of this course students will be able to:

1. Develop critical understanding how a single-celled fertilized egg transforms into an embryo and then a fully formed adult by complex processes of cell division, cell differentiation and morphogenesis.
2. Understand the initial developmental procedures involved in frog and chick.
3. Appreciate the mechanisms that support growth and development and process of gene function.
4. Learn interesting and unique post embryonic development that happens in vertebrates.
5. Learn implication of developmental biology in medicine or its role in development of diseases.
6. Identify whole mounts of developmental stages of chick embryo growth and differentiation in different hours of incubation through permanent slides. Students will be able to recognize embryonic tissue and organ morphology and structure in clinical specimens.
7. Gain a basic knowledge on the life cycle of the model organism Drosophila and its developmental stages.
8. Acquire knowledge on the different sections of placenta and their histogenesis through micrograph or slides.
9. They can analyse variations at different stages of embryonic development and distinguish between healthy and pathological tissues in specimens.
10. Learn the techniques of Drosophila culture and chick embryo development through short term project.

Course Name: Core Course-14
Course Code: ZOOACOR14T & ZOOACOR14P
Topic Name: Evolutionary Biology

Course Outcome: After successful completion of this course students will be able to:

1. Understand the origin and evolution of universe and earliest life.
2. Develop the historical concept of the process and theories in evolutionary biology and the role of evidences in support of evolution.
3. Develop knowledge about sources of variation and concept of population genetics and can apply them in relevant experimentation.
4. Understand species concept, extinction and molecular phylogeny and able to apply it in their lives and community analysis.
5. Examine the evolutionary changes in different taxa based on statistical analysis.
6. Learn how to study a fossil from model or photograph and analyze homology and analogy of structures from suitable specimens. They can observe and interpret about the events that took place in geologic past.
7. Think critically and logically to make relationship between evidence and explanations.
8. Verify Hardy-Weinberg equilibrium in a population by learning the chi-square calculation method and other statistical analysis from collected data.

Course Name: Discipline Specific Elective-1
Course Code: ZOOADSE01T & ZOOADSE01P
Topic Name: Animal Behaviour and Chronobiology

Course Outcome:

1. Learn a wide range of theoretical and practical techniques used to study animal behaviour.
2. Develop skills, concepts and experience to understand all aspects of animal behaviour.
3. Objectively understand and evaluate information about animal behaviour and ecology encountered in our daily lives.
4. Understand and be able to objectively evaluate the role of behaviour in the protection and conservation of animals in the wild.
5. Consider and evaluate behaviour of all animals, including humans, in the complex ecological world, including the urban environment

Course Name: Discipline Specific Elective-2
Course Code: ZOOADSE02T & ZOOADSE02P
Topic Name: Entomology (Insects and their Biology)

Course Outcome:

1. Know the evolutionary and functional basis of animal ecology.
2. Understand what makes the scientific study of animal ecology a crucial and exciting endeavour.
3. Engage in field-based research activities to understand well the theoretical aspects taught besides learning techniques for gathering data in the field.
4. Analyse a biological problem, derive testable hypotheses and then design experiments and put the tests into practice.
5. Solve the environmental problems involving interaction of humans and natural systems at local or global level.

Course Name: Discipline Specific Elective-3
Course Code: ZOOADSE03T & ZOOADSE03P
Topic Name: Endocrinology

Course Outcome:

1. Understand neurohormones and neurosecretions.
2. Learning about hypothalamo and hypophyseal axis.
3. Understand about different endocrine glands and their disorders
4. Understand the mechanism of hormone action.

Course Name: Discipline Specific Elective-5
Course Code: ZOOADSE05T & ZOOADSE05P
Topic Name: Parasitology

Course Outcome: After successful completion of this course students will be able to:

1. Understand parasitism, diversity of symbiotic associations and the biology behind host-parasite interactions.
2. Learn about epidemiological concepts of parasitic infections of global importance.
3. Gain knowledge of numerous diseases which have significant impact on human health.
4. Diagnose, identify and detect some important protozoan, helminth and arthropod parasites of human and livestock.
5. Analyze challenges in diagnosis, treatment and control of parasitic infections in humans and in veterinary context. Also learn pathological changes associated with parasite infections.
6. Identify, describe and contrast different protozoan, helminth and arthropod parasites responsible for causing various human and veterinary diseases through permanent slides or microphotographs.
7. Prepare and observe live parasitic specimens from fish gills and intestine of poultry birds. This gives them an idea of size, shape, colour pattern and unique morphological features and location of important external and internal pathogens and parasites from different phyla.
8. Learn the techniques to identify plant parasitic root knot nematodes from soil samples which will be beneficial for further advance knowledge generation.
9. Develop the skill to isolate, identify and fixation and preservation of different parasites from animal body in laboratory using microscopes

Course Name: Discipline Specific Elective-6
Course Code: ZOOADSE06T & ZOOADSE06P
Topic Name: Wildlife and Conservation

Course Outcome: After successful completion of this course students will be able to:

1. Develop an understanding of general principles of ecology and how animals interact with each other and their natural environment
2. Apply knowledge to solve problems related to wildlife conservation and management.
3. To identify common local flora and fauna and how they related to terrestrial and/or aquatic plant and animal conservation and management.
4. Critically evaluate current events and public information related to man animal conflict and other wildlife conservation issues.
5. Understand conservation ethics and acts practiced in India.
6. Develop skills for field study and biodiversity analysis.
7. Identify common local flora and fauna like mammalian, avian and herpetofauna and their normal habitat.
8. Acquainted with the basic equipments and their uses for wildlife study.
9. Develop the skill for estimation of flora and fauna diversity and relative abundance through variuos ecological tools and field techniques.

Course Name: Skill Enhancement Course-1
Course Code: ZOOSSEC01M
Topic Name: Aquarium Fish Keeping

Course Outcome: Knowledge on the followings

1. To learn the scientific method of setting an aquarium
2. To learn the culture breeding and marketing techniques of common indigenous ornamental fishes

Course Name: Skill Enhancement Course-2
Course Code: ZOOSSEC02M
Topic Name: Vermicompost Production

Course Outcome:

1. Understanding the role of worm farming in Modern Farming
2. Understanding the potential of vermicompost as an alternative to chemical fertilizers
3. Role of vermiculture in maintaining the health of soil and humans
4. Economic importance of vermiculture
5. Role of Vermiculture in protecting the environment and managing the waste

BARASAT GOVERNMENT COLLEGE
Course Outcome or Learning Outcome
Three year B.A. /B.Sc. degree course
Under CBCS semester system
GENERAL COURSE IN ZOOLOGY
With effect from the session: 2018 – 2019

Course Name: Generic Elective/Department Specific Core Course-1
Course Code: ZOOHGEC01T & ZOOHGEC01P / ZOOGCOR01T & ZOOGCOR01P
Topic Name: Animal Diversity

Course Outcome: Knowledge on the followings:

1. Develop understanding on the diversity of life with regard to protists, non-chordates and chordates.
2. Group animals on the basis of their morphological characteristics / structures.
3. Develop critical understanding how animals changed from a primitive cell to a collection of simple cells to form a complex body plan.
4. Examine the diversity and evolutionary history of a taxon through the construction of a basic phylogenetic/cladistics tree.
5. Understand how morphological change due to change in environment helps drive evolution over a long period of time.
6. The project assignment will also give them a flavour of research to find the process involved in studying biodiversity and taxonomy besides improving their writing skills.
7. It will further enable the students to think and interpret individually due to different animal species chosen.

Course Name: Generic Elective/Department Specific Core Course-2
Course Code: ZOOHGEC02T & ZOOHGEC02P / ZOOGCOR02T & ZOOGCOR02P
Topic Name: Human Physiology & Biochemistry

Course Outcome: Knowledge on the followings

1. Understand the process of digestion and its control.
2. Develop understanding in muscle structure and contraction mechanism.
3. Learn the process of respiration and transport of gases.
4. Understand kidney structure and regulation of urine formation.
5. Understand heart structure and functioning.
6. Understand function of endocrine glands and formation of gametes.
7. Understand about the importance and scope of biochemistry.

Course Name: Generic Elective/Department Specific Core Course-3
Course Code: ZOOHGEC03T & ZOOHGEC03P / ZOOGCOR03T & ZOOGCOR03P
Topic Name: Insect Vectors and Diseases

Course Outcome: Knowledge on the followings

1. To learn understand the general features of insects and gain knowledge about their distribution and success on Planet Earth and to learn Insect's taxonomy, general morphology and physiology
2. Learn about vector and vector borne diseases.
3. Describe the mechanisms for transmission, virulence and pathogenicity in pathogenic micro-organisms.
4. Diagnose the causative agents, describe pathogenesis and treatment for important diseases like malaria, leishmaniasis, Dengue, Chikungunya, Viral encephalitis, Filariasis
5. Explain how the infectious disease can transmit to human.
6. Properly understand the prevention and control mechanism of infectious diseases
7. Develop education, communication programme and learn how to maintain proper WHO guidelines about infectious diseases.

Course Name: Generic Elective/Department Specific Core Course-4
Course Code: ZOOHGEC04T & ZOOHGEC04P / ZOOGCOR04T & ZOOGCOR04P
Topic Name: Environment and Public Health

Course Outcome: Knowledge on the followings

1. Understand different causes of environmental pollution and their remedies
2. Learn about the depletion and contamination of natural resources.
3. To learn waste management technologies and its applications.
4. Develop awareness about the causative agents and control measures of many commonly occurring diseases.

Course Name: Department Specific Elective-1
Course Code: ZOOGDSE01T & ZOOGDSE01P
Topic Name: Applied Zoology

Course Outcome: Knowledge on the followings

1. Describe the mechanisms for transmission, virulence and pathogenicity in pathogenic micro-organisms.
2. Diagnose the causative agents, describe pathogenesis and treatment for important diseases like Tuberculosis, Typhoid ,Entamoeba histolytica, Plasmodium vivax and Trypanosoma gambiense , Ancylostoma duodenale and Wuchereria bancrofti etc
3. Develop an understanding of the classification of fishesand integrating structure, function and physiology
4. Gain an overview of the fishery and aquaculture industry
5. Express the importance of aquaculture
6. To understand the techniques involved in aquaculture practices.

Course Name: Department Specific Elective-2
Course Code: ZOOGDSE03T & ZOOGDSE03P
Topic Name: Aquatic Biology

Course Outcome: Knowledge on the followings

1. Understand and apply relevant scientific principles in the area of aquatic biology.
2. Employ scientific methodologies such as experimentation and data analysis in the area of aquatic biology.
3. Critically analyse, interpret and evaluate information relevant to aquatic biology.
4. Appreciate the multidisciplinary nature of the study of aquatic biology and engage positively with people and ideas beyond their own discipline.
5. Explore some of the unique environmental problems dealing with aquatic environments.
6. Develop employable skills in freshwater biological water quality analysis.

BARASAT GOVT COLLEGE
POST GRADUATE DEPARTMENT OF ZOOLOGY
B.Sc. Zoology (General) CBCS Syllabus
With effect from 2018-19

Programme Specific Outcomes

- Capable of demonstrating comprehensive knowledge and understanding of major concepts, theoretical principles and experimental findings in Zoology and its different subfields (animal diversity, Environment and Public Health, physiology and biochemistry, applied Zoology, aquatic biology, immunology, Food, Nutrition and Health and insect, vectors and diseases).
- Skilled communicator: Ability to impart complex technical knowledge relating to Zoology in a clear and concise manner in writing and oral skills.
- Sense of inquiry: Capability for asking relevant/appropriate questions relating to issues and problems in the field of Zoology, and planning, executing and reporting the results of an experiment or investigation.
- Team player/worker: Capable of working effectively in diverse teams in both classroom, laboratory and in industry and field-based situations.
- Skilled project manager: Capable of identifying/mobilizing appropriate resources required for a project, and manage a project to completion, while observing responsible and ethical scientific conduct; and safety and chemical hygiene regulations and practices.
- Lifelong learners: Capable of self-paced and self-directed learning aimed at personal development and for improving knowledge/skill development and reskilling.

BARASAT GOVT COLLEGE
POST GRADUATE DEPARTMENT OF BOTANY
B.Sc. Botany (General) CBCS Syllabus
With effect from 2018-19

Programme Specific Outcomes

- The CBCS course in Botany has been designed not only to impart knowledge regarding traditional as well as interdisciplinary areas of plant science but also to develop a thorough understanding about the overall scope and importance of modern plant biology.
- Through the course, the students can gain in-depth knowledge regarding classical as well as advanced topics like Research Methodology, Bioinformatics, Biotechnology and Bioinstrumentation.
- The course aims to make the students proficient in basic and applied aspects of plant biology through the transfer of knowledge in the classroom as well as in the laboratory.
- The ability and skill enhancement courses included in the curriculum will facilitate understanding of students on few allied areas of the subject (like Environmental Science, Plant Diversity, Ethnobotany etc.) and enable them to gain exposure to future places/areas of employment.

BARASAT GOVERNMENT COLLEGE
Course Outcome or Learning Outcome
Three year B.A. /B.Sc. degree course
Under CBCS semester system
GENERAL COURSE IN BOTANY
With effect from the session: 2018 – 2019

Course Name: Generic Elective/Department Specific Core Course-1
Course Code: BOTHGEC01T & BOTHGEC01P / BOTGCOR01T & BOTGCOR01P
Topic Name: Biodiversity (Microbes, Algae, Fungi and Archegoniate)

Course Outcome: Upon successful completion of the course including practical: Students will know about biological variety, variations and components of biodiversity as a whole.

1. They will be familiar with different groups of plant including viruses and bacteria.
2. Understand the general structure and difference between prokaryotes and eukaryotes.
3. Familiar with characteristics, diversity, growth form, classification, ecological and economic importance of algae, fungi, bryophytes, pteridophytes and gymnosperms.
4. After completion of laboratory study, students will be familiar with the diversity of algae, fungi, bryophytes, pteridophytes and gymnosperms in various habitats and identification using morphological techniques.

Course Name: Generic Elective/Department Specific Core Course-2
Course Code: BOTHGEC02T & BOTHGEC02P / BOTGCOR02T & BOTGCOR02P
Topic Name: Plant Ecology and Taxonomy

Course Outcome: Upon successful completion of the course including practical, students will be able to:

1. Understand the interactions of abiotic and biotic components of environment- maintaining an equilibrium essential for the very existence of all living beings including ours.
2. Gather knowledge of plant communities and ecosystems which are the basic footsteps of environmental studies.
3. Get knowledge of different aspects of environmental issues which help us to protect biodiversity in turn sustaining ourselves.
4. Identify plants, learning their names and characters in plant taxonomy.
5. Sound knowledge of Plant Ecology and Taxonomy together helps to boost knowledge and love for our environment.

Course Name: Generic Elective/Department Specific Core Course-3
Course Code: BOTHGEC03T & BOTHGEC03P / BOTGCOR03T & BOTGCOR03P
Topic Name: Plant Anatomy and Embryology

Course Outcome: Upon successful completion of the course including practical, students will be able to understand:

1. Study of the internal structure of plants and relationship of different group with their external structure as well as the surrounding environment.
2. The adaptations of different plants to survive in different environmental conditions thus helping to protect environment.
3. Study of structural organization of flowers to identify plants which is in turn important for study of plant biodiversity.
4. Knowledge of pollination and fertilization to know plant reproductive behaviors. It helps to understand whether any plant species is vulnerable or going towards criticalness in survivorship.

Course Name: Generic Elective/Department Specific Core Course-4
Course Code: BOTHGEC04T & BOTHGEC04P / BOTGCOR04T & BOTGCOR04P
Topic Name: Plant Physiology and Metabolism

Course Outcome: Upon successful completion of the course including practical, students will be able to understand:

1. General concepts of Plant Physiology and Metabolism which includes water relations, photosynthesis, respiration and nitrogen metabolism.
2. Structure function and synthesis of plant hormones as plant growth regulators.
3. Students will learn to carry out different plant physiological experiments photosynthesis, respiration, transpiration, plasmolysis etc.

Course Name: Department Specific Elective-1
Course Code: BOTGDSE01T & BOTGDSE01P
Topic Name: Cell and Molecular Biology

Course Outcome: Upon successful completion of the course including practical:

1. This course will familiarize the students with very basic aspects of cell biology.
2. Through this course the students will get a basic idea on the structural details and functional aspects of major cell organelles.
3. This course will also focus on understanding the fundamental mechanisms for the organization, replication, expression, variation, and evolution of the genetic material at a molecular level.
4. To acquire hands on training to different experiments of cell and molecular biology.

Course Name: Department Specific Elective-2
Course Code: BOTGDSE04T & BOTGDSE04P
Topic Name: Analytical Techniques in Plant Sciences

Course Outcome: After successful completion of this course including practical students will be able to understand techniques used in Plant Sciences like imaging, Flow cytometry, FACS, FISH, centrifugation, use of radio isotopes, spectrophotometry , biostatistics etc

BARASAT GOVT COLLEGE

UNDER GRADUATE DEPARTMENT OF CHEMISTRY

Programme Specific Outcomes

B.Sc. Chemistry (General) CBCS Syllabus

With effect from 2018-19

At the completion of this program, students will be able to

- **PSO1:** Understand the basic concepts, principles and applications of chemistry, viz. Physical, Organic Inorganic and Analytical chemistry.
- **PSO2:** Acquire knowledge of the preparation procedures of several everyday chemical compounds like cement, paint, ceramic, glass etc. along with their properties.
- **PSO3:** Estimate and analyse inorganic and organic compounds both qualitatively and quantitatively and learn the use of analytical instruments.
- **PSO4:** Get acquainted with the composition of biological systems viz. carbohydrates, proteins, lipids, enzymes, their properties, functionalities and structure along with their estimation procedures.
- **PSO5:** Learn the composition, properties and estimation techniques of environmental constituents like soil, water, food products etc.

BARASAT GOVERNMENT COLLEGE
Course Outcome or Learning Outcome
Three year B.A. /B.Sc. degree course
Under CBCS semester system
GENERAL COURSE IN CHEMISTRY
With effect from the session: 2018 – 2019

Course Name: Generic Elective/Department Specific Core Course-1
Course Code: CEMHGEC01T & CEMHGEC01P / CEMGCOR01T & CEMGCOR01P
Topic Name: ATOMIC STRUCTURE, CHEMICAL PERIODICITY, ACID AND BASE, REDOX REACTIONS, GENERAL CHEMISTRY & ALIPHATIC HYDROCARBONS

Course Outcome: After the completion of the course students will learn the followings:

1. fundamental of Quantum mechanics and atomic structure, chemical periodicity, acid & base, redox reactions.
2. fundamentals of organic chemistry, concept of Stereochemistry, elementary mechanistic aspects of nucleophilic substitution and Elimination Reactions, fundamental group approach of Aliphatic Hydrocarbons.
3. Estimation of sodium carbonate and sodium bicarbonate present in a mixture, estimation of oxalic acid, water of crystallisation in Mohr's salt, Fe (II) ions and Cu (II) ions by different methods.
4. Qualitative Analysis of Single Organic Compounds.

Course Name: Generic Elective/Department Specific Core Course-2
Course Code: CEMHGEC02T & CEMHGEC02P / CEMGCOR02T & CEMGCOR02P
Topic Name: STATES OF MATTER & CHEMICAL KINETICS, CHEMICAL BONDING & MOLECULAR STRUCTURE, p-BLOCK ELEMENTS

Course Outcome: After successful completion of the theoretical and practical modules of this course the students will learn:

- (1) The general behaviour and properties of the different state of matter viz. solid, liquid and gas.
- (2) The different factors that affect the rate of a chemical reaction and the methods of determination of rate and order.
- (3) The various types of bonding involved in a molecular structure and the concept of resonance.
- (4) Properties and reactions of p-block elements (6) Hands on experience in qualitative analysis of inorganic samples and measurement of properties of liquids like viscosity, surface tension etc.

Course Name: Generic Elective/Department Specific Core Course-3
Course Code: CEMHGEC03T & CEMHGEC03P / CEMGCOR03T & CEMGCOR03P
Topic Name: CHEMICAL ENERGETICS, EQUILIBRIA, ORGANIC CHEMISTRY-II

Course Outcome: After successful completion of both theoretical and practical modules of this course the student would acquire knowledge of

- (1) the basic principles and laws of thermodynamics
- (2) the concept of chemical equilibrium and the factors affecting it
- (3) Idea about ionic equilibria, pH and solubility
- (4) Preparation and properties of organic compounds like alcohols, aromatic hydrocarbons etc.
- (5) Hands on determination of pH and identification of organic compounds.

Course Name: Generic Elective/Department Specific Core Course-4
Course Code: CEMHGEC04T & CEMHGEC04P / CEMGCOR04T & CEMGCOR04P
Topic Name: SOLUTIONS, PHASE EQUILIBRIA, CONDUCTANCE, ELECTRO CHEMISTRY & ANALYTICAL AND ENVIRONMENTAL CHEMISTRY-I

Course Outcome: After successful completion of both theory and practical modules of the course students will be able to

1. Understand the fundamental concept of basic physical chemistry based on solution, phase equilibrium, conductance and electromotive force. They are also acquainted with the problem solving technique based on aforesaid physical phenomenon.
2. Understand few analytical concepts based on gravimetric and volumetric analysis. Side by side they are also acquainted with chromatographic methods of analysis using column and thin layer chromatography. They also acquire some knowledge on environmental chemistry, related pollution, their consequence and probable remedies.
3. Perform some practical based on aforesaid knowledge.

Course Name: Department Specific Elective-1
Course Code: CEMGDSE01T & CEMGDSE01P
Topic Name: Polymer Chemistry

Course Outcome: The students learn about the classification, the nature of molecular forces in polymers, the functionality of monomers, the degree of polymerization. They study the kinetic of addition and condensation polymerization. They become familiar with the determination of molecular weight of polymers, the concept of glass transition temperature. They learn about the preliminary ideas of thermodynamics of polymer solutions. They get ideas on the brief introduction to preparation, structure, properties and application of the some important polymers. In the laboratory the students learn how to

(i) synthesize some of the polymers. (ii) measure the molecular weight and (iii) analyze the polymers.

Course Name: Department Specific Elective-2
Course Code: CEMGDSE03T & CEMGDSE03P
Topic Name: Inorganic Materials of Industrial Importance

Course Outcome: After studying of the course, both theory and practical, the following outcome is expected

1. Learning the procedure of preparation of cement, ceramics and glass and their applications.
2. Learning the procedure of preparation of important fertilizers, paints and pigments
3. Learning the procedure of preparation of different types of batteries and alloys and their properties
4. Learning the utility of using different catalysts in different chemical reactions.
5. Learning of different kinds of explosives
6. hands on experiment in analyzing useful materials like fertilisers, cement, plastic etc.
